Response to Amendment

1. Applicant's arguments filed on April 14, 2005 have been considered and are deemed persuasive. However, they are moot in view of the new ground(s) of rejection.

- Claims 1-39 are presented for examination.
- Claims 2, 8-9, 11, 13, 20, 26-27, and 31 are amended.

Allowable Subject Matter

2. Claims 2, 13, 14, 20 and 31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2153

3. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: the claim reads a kernel configured for passing the detected IP frames independent of any specified IP destination addresses. It is not clear where the detected IP frames are passed to and why. The specification mentions " the kernel 24 can be configured for forwarding all IP frames, independent of the destination IP address of the received IP frame, to the executable emulation application 26 via the appropriate socket 28a or 28b for processing." Page 4, line 27 to page 5, line 1.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual

Art Unit: 2153

Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1,12,19 and 30 are rejected under 35 U.S.C. 102(e) as being anticipated by Kram (US. Patent No. 6314531).

4. As per claims 1,12,19 and 30, Kram teaches the invention of emulating IP devices in a protocol emulator (abstract and fig. 3, comprising:

Promiscuously detecting IP frames on a network interface (fig. 4 shows a promiscuous reader for examining all packets seen by directly connected interfaces col. 6, lines 31-43);

generating, for each corresponding detected IP frame, a response IP frame by an executable emulation application (emulation program reads/examines the source and destination IP address from the header of each packets and generates various actions based on that information col. 5, lines 2-27 and col. 5, lines 55-66. See also col. 6, lines 31-60); and

outputting each said response IP frames by a row socket

Art Unit: 2153

onto the network interface (col. 4, lines 49 to col. 5, line 11 and col. 7, lines 19-26).

Conclusion

5. The prior made of record and not relied upon is considered pertinent to applicant's disclosure.
